Prasanth Kakarla

Salesforce Architect · Field Service (FSL) · SAP Integration

linkedin.com/in/prasanthkakarla | Hyderabad, India

CORE EXPERTISE

Salesforce Platform

Field Service (FSL) · Service Cloud · Sales Cloud · Apex · LWC · Flow · Visualforce · SOQL · GraphQL · Data Loader

Integration

SAP ERP · REST APIs · Named Credentials · Queueable / Batch · Integration Logging

Architecture

Multi-region · Sharing & FLS · Data Migration · Governor Limits · Offline / Mobile

Delivery

SFDX · Agile / Scrum · Requirements · Documentation · Stakeholders

CERTIFICATIONS

- Salesforce Architect
- Salesforce Certified Field Service Consultant
- Salesforce Certified Service Cloud Consultant
- Salesforce Certified Platform Developer I
- Salesforce Certified Platform App Builder
- Salesforce Certified Administrator
- Scrum Fundamentals Certified (SFC)

EDUCATION

B.Tech, Electrical, Electronics & Communications Engineering
Lord's Institute of Engineering and Technology · 2004 – 2007

LANGUAGES

English · Hindi · Telugu · Tamil

PROFESSIONAL SUMMARY

Salesforce Architect with **10+ years** in the Salesforce ecosystem and 16+ years in enterprise service operations, specialising in **Field Service (FSL)**, **Service Cloud** and **Sales Cloud** solutions integrated with **SAP ERP**. Progressed from **Consultant to Architect** on the Hitachi Global Air Power (HGAP) transformation, owning solution architecture across Apex, LWC, Flow and REST integration layers for a **multi-region (AU/US)** rollout. Turns complex cross-system processes (parts, quoting, labour, billing) into scalable, governor-limit-aware, supportable solutions.

10+	AU + US	FSL × SAP	7
Years in Salesforce	Multi-region rollout	End-to-end integration	Salesforce & Scrum certs

PROFESSIONAL EXPERIENCE

Salesforce Architect — Present

Hitachi Global Air Power (HGAP) · Field Service Transformation

PROMOTED: CONSULTANT → ARCHITECT

- **Architected the FSL ↔ SAP integration backbone:** Work Order creation, parts availability & pricing, customer credit checks, order confirmation, returns and DMR billing, using Named Credentials, Queueable callouts, idempotency guards and centralised integration logging.
- **Designed inbound REST APIs** (Asset, Location) with external-ID upserts, account scoping and FLS-safe execution; implemented **selective-field outbound sync** with three-state partner logic to prevent unintended data overwrites.
- **Led multi-region (AU/US) architecture:** region-scoped Flows and Apex, dynamic SAP plant / sales-org resolution, multi-currency pricebooks, US quote PDF generation with live SAP tax, and decoupled Quote from Opportunity to allow direct-from-Account quoting; supporting phased US city go-lives.
- **Architecting and implementing Sales Cloud (US):** Lead → Account & Contact → Opportunity → Quote → Order on the same platform as FSL, with record-type scoping and region-scoped automation.
- **Engineered the FSL mobile experience:** LWCs on GraphQL wire adapters and *uiRecordApi*, multi-wire settle-gate patterns, Briefcase-cache race-condition fixes, and Apex managed sharing (*WorkPlanShare*, *ServiceAppointmentShare*) via triggers and Record-Triggered Flows.
- **Configured and extended Appointment Bundling:** aggregation policies and bundle Work Order sync (territory, account) so bundles surface correctly in the Dispatcher Console.
- **Built a timezone-aware Labour & overtime engine** (Operating Hours, multi-day appointments, per-day thresholds) with Batch + Schedulable recalculation on a 15-minute cycle; eliminated Flow conflicts that caused transaction rollbacks.
- **Release governance:** diagnosed and resolved failing Apex tests blocking a production deployment (missing fields, FLS in test setup, platform constraints); SFDX metadata / package.xml management; authored FSL AI use-case documentation and stakeholder-ready deliverables.

DOMAIN DEPTH

Lead-to-Order | Field Service | Dispatch & Scheduling | Parts & Inventory | Quoting | Billing (DMR) | Labour & Overtime | Asset Management

HOW I WORK

- Architecture-first: design for scale, security and supportability before build.
- Integration-minded: idempotent, observable, retry-safe callouts.
- Business-fluent: translate field operations into platform capability.
- Documentation-led: specs, runbooks and stakeholder-ready deliverables.

CAREER PATH

2010
Analyst → Team Lead → QA / Trainer

2016
Salesforce Technical Engineer

HGAP
Salesforce Consultant

Now
Salesforce Architect

EXPERIENCE (CONTINUED)

Salesforce Consultant — Initial phase

Hitachi Global Air Power (HGAP) · FSL + SAP Programme

- **Led discovery and solution design** for the FSL implementation, translating field-service workflows into configuration: Operating Hours, Service Territories, Dispatcher Console and Briefcase Builder (offline).
- **Delivered the first SAP integration slice:** Work Order sync and the order-confirmation framework (Queueable job + builder pattern).
- **Executed asset data migration** using Data Loader workflows and SAP equipment reconciliation.
- **Established reusable patterns** (Named Credentials, async callouts, integration logging) later adopted across the platform.

Salesforce Technical Engineer — Sep 2016 – Aug 2025

Salesforce Administration & Platform Support

- Administered and optimised Salesforce for day-to-day business, improving business-process performance by **up to 25%** through targeted configuration.
- Implemented an end-to-end **BI solution framework**; designed security measures and data-quality controls (deduplication, cleansing, validation).
- Authored technical and functional specifications; tested applications against requirements; trained and supported end users.

EARLIER CAREER

Telerx (C3i Healthcare Connections) · Level I Analyst → Level II Analyst → Team Lead → Sr. Team Lead → Sr. QA / Trainer · **2010 – 2016**
Led and coached teams, owned quality metrics and leadership reporting, designed process training and drove productivity improvements. Foundation for the stakeholder-facing, process-first approach used in consulting today.

TECHNICAL TOOLKIT

Languages & UI	Apex, SOQL/SOSL, JavaScript (LWC), Visualforce, Flow, GraphQL
Field Service	Work Types, Service Territories, Operating Hours, Dispatcher Console, Appointment Bundling, Briefcase Builder, FSL Mobile
Integration & Data	REST (inbound/outbound), Named Credentials, Queueable / Batch / Schedulable, SAP ERP, Data Loader, data migration
Security & Quality	Sharing model, FLS, Apex managed sharing, Apex test strategy, release readiness
Delivery	SFDX, metadata / package.xml, Agile / Scrum, specs & runbooks, stakeholder workshops
